

Website www.healthytravel.ch Health Advice for Travellers

The Swiss Expert Committee for Travel Medicine (ECTM) – a body of the Swiss Society for Tropical and Travel Medicine (FMH) – has revamped the Safetravel® website and renamed it www.healthytravel.ch.

The website www.healthytravel.ch continues to provide basic travel medicine recommendations for laypersons free of charge. Professionals can also subscribe for a fee to additional travel medicine information and recommendations (**PRO version**) such as in-depth country-specific information, vaccination recommendations with expert opinions, detailed maps (including malaria recommendations), fact sheets (including e.g. dosage information for malaria prophylaxis for adults and children), information for special risk travellers and other important travel medicine content. All information can be used during travel medicine consultation and can be individually compiled for each traveller, printed out or sent electronically. A trial version is available.

The recommendations and contents on www.healthytravel.ch correspond to the recommendations of the ECTM. The website www.healthytravel.ch is supported by the Federal Office of Public Health (FOPH); it is currently under construction and will be continuously expanded with additional content and updates.

The website www.healthytravel.ch replaces from now on the document «Reisemedizin: Impfung und Malariaschutz bei Auslandsreisen»/«Santé-voyages: Vaccinations et mesures anti-paludiques» (not available in English) updated so far annually on www.bag.admin.ch/reisemedizin/ www.bag.admin.ch/sante-voyages.

Further information on Healthy Travel PRO can be found in the [flyer](#).

The Swiss Expert Committee for Travel Medicine will be happy to answer any questions about Healthy Travel PRO at info@healthytravel.ch.

Please note: as of July 2021, the ECTM is no longer the author of the content and recommendations on www.tropimed.ch.
