## Test case #13992 CH:UPI\_eCH0213\_SPID\_CANCEL

### Test Summary

**Keyword :** CH:UPI\_eCH0213\_SPID\_CANCEL\_CTS      **Type :** conformity assessment  
**Name :** CH:UPI\_eCH0213\_SPID\_CANCEL      **Peer Type :** NO\_PEER\_TEST  
**Version :** 2.1      **Status :** ready  
**Author :** vhofman      **Verified by :** **Not verified**  
**Date of last** 2024-01-26 16:26:51.311553 by vhofman

**Short Description :** UPI client send an eCH0213 request to cancel the SPID for a patient

### Test Description

**Special Instructions**

In this test, the SUT will have to send an eCH0213 request asking for the cancellation of a patient SPID to the UPI Simulator.

The validation of your message in this test case will require the logs of your transaction, that will be available in the Gazelle Proxy.

Test Session Manager have to configure this simulator in Gazelle.

To know which port you have to use, please consult Gazelle TM/ Configurations/ All configurations webpage.

The data available for this test case can be found at : [https://ehealthsuisse.ihe-europe.net/test\\_data/UPI/230912\\_TestDataSet\\_PAT.xlsx](https://ehealthsuisse.ihe-europe.net/test_data/UPI/230912_TestDataSet_PAT.xlsx)

UPI endpoint : [https://<gazelle\\_platform>.<UPI's proxy port>/upi-simulator/UPISedexManageWS](https://<gazelle_platform>.<UPI's proxy port>/upi-simulator/UPISedexManageWS)

**Description**

- Pick a patient from the test data with at least one active SPID (See "active tab")

- Send an eCH0213 request from your system to the UPI service, using the following attributes in "<eCH-0213:content>" :

- <eCH-0213:actionOnSPID>cancel</eCH-0213:actionOnSPID>
- <eCH-0213:pidsToUPI>...<eCH-0213-commons:SPID>

You shall receive a 200 http message with the sent demographic and the SPID.

- Once the logs have been recovered, validate your request :

1. Go to the EVS Client validator : [EPR->CH:UPI->Validate](#)
2. Upload the log of your request in XML format (Soap tags have to be removed/commented)
3. Select the **eCH-0213** schematron validator from the drop-down list
4. Click on **Validate**
5. Copy the permanent link to your validation in the corresponding test step

**Evaluation**

The validations on EVS Client must return "**Passed**".

Show the response from UPI simulator received by your system to confirm that the SPID of the selected patient have been succesfully cancelled by the tool.

**Short Description :** UPI client send an eCH0213 request to create an SPID for a patient

## Test Description

### Special Instructions

In this test, the SUT will have to send an eCH0213 request asking for the creation of a patient SPID to the UPI Simulator.

The validation of your message in this test case will require the logs of your transaction, that will be available in the Gazelle Proxy.

Test Session Manager have to configure this simulator in Gazelle.

To know which port you have to use, please consult Gazelle TM/ Configurations/ All configurations webpage.

The data available for this test case can be found at : [https://ehealthsuisse.ihe-europe.net/test\\_data/UPI/230912\\_TestDataSet\\_PAT.xlsx](https://ehealthsuisse.ihe-europe.net/test_data/UPI/230912_TestDataSet_PAT.xlsx)

UPI endpoint : `https://<gazelle_platform>:<UPI's proxy port>/upi-simulator/UPISedexManageWS`

### Description

- Pick a patient from the test data in the sheet "Persons" who has an allocation (Zuweisung) set as No EPR-SPID.  
(i.e. Klaus Walter IMFELD-LUSSI)

- Send an eCH0213 request from your system to the UPI service, using the following attributes (you'll need his NAVS and demographics) :

- `<eCH-0213:actionOnSPID>generate</eCH-0213:actionOnSPID>`
- `<eCH-0213:pidsToUPI>...<eCH-0213-commons:vn> (NAVS)`
- `<eCH-0213:personToUPI> (demographics)`

You shall receive a 200 http message with the sent demographic and the SPID.

- You can consult the logs of your transaction in the "Messages" menu of the Proxy.

- Once the logs have been found, validate your request :

1. Go to the EVS Client validator : [EPR->CH:UPI->Validate](#)
2. Upload the log of your request in XML format (Soap tags have to be removed/commented)
3. Select the **eCH-0213** schematron validator from the drop-down list
4. Click on **Validate**
5. Copy the permanent link to your validation in the corresponding test step

### Evaluation

The validations on EVS Client must return "**Passed**".

Show the response from the UPI Simulator received by your system to confirm that the SPID of the selected patient have been successfully created by the tool (it must contains **e-CH0213:positiveResponse**).

**Short Description :** UPI client send an eCH0213 request to inactivate an SPID for a patient

## Test Description

### Special Instructions

In this test, the SUT will have to send an eCH0213 request asking for the inactivation of a patient SPID to the UPI Simulator.

The validation of your message in this test case will require the logs of your transaction, that will be available in the Gazelle Proxy.

Test Session Manager have to configure this simulator in Gazelle.

To know which port you have to use, please consult Gazelle TM/ Configurations/ All configurations webpage.

The data available for this test case can be found at : [https://ehealthsuisse.ihe-europe.net/test\\_data/UPI/230912\\_TestDataSet\\_PAT.xlsx](https://ehealthsuisse.ihe-europe.net/test_data/UPI/230912_TestDataSet_PAT.xlsx)

UPI endpoint : `https://<gazelle_platform>:<UPI's proxy port>/upi-simulator/UPISedexManageWS`

### Description

- Pick a patient from the test data with at least one active SPID, you shall enter the value "73575701N4C71V4730" as 2nd SPID.

- Send an eCH0213 request from your system to the UPI service, using the following attributes :

- `<eCH-0213:actionOnSPID>inactivate</eCH-0213:actionOnSPID>`
- `<eCH-0213:pidsToUPI>...<eCH-0213-commons:SPID>`

You shall receive a 200 http message with the demographic and the first SPID sent.

- You can consult the logs of your transaction in the "Messages" menu of the Proxy.

- Once the logs have been recovered, validate your request :

1. Go to the EVS Client validator : [EPR->CH:UPI->Validate](#)
2. Upload the log of your request in XML format (Soap tags have to be removed/commented)
3. Select the **eCH-0213** schematron validator from the drop-down list
4. Click on **Validate**
5. Copy the permanent link to your validation in the corresponding test step

### Evaluation

The validations on EVS Client must return "Passed".

Show the response from the UPI Simulator received by your system to confirm that the SPID of the selected patient have been successfully inactivated by the tool (it must contains **e-CH0213:positiveResponse**).

**Short Description :** UPI client send an eCH0214 request for a patient attributes using his demographics.

## Test Description

**Prerequisites**

Depending on the context, Gazelle Proxy can be used :

- If this test instance is related to a preProjectathon, using the Proxy isn't mandatory.
- If this test instance is related to a SIA, the SUT manager must request a proxy port from the test session manager.

**Special Instructions**

In this test, the SUT will have to send an eCH0214 request asking for the attributes of a patient from his demographics to the UPI Simulator.

The validation of your message in this test case will require the logs of your transaction, please add the validation report's permanent link to the corresponding test step.

The data available for this test case can be found at : [https://ehealthsuisse.ihe-europe.net/test\\_data/UPI/230912\\_TestDataSet\\_PAT.xlsx](https://ehealthsuisse.ihe-europe.net/test_data/UPI/230912_TestDataSet_PAT.xlsx)

UPI endpoint : `https://<gazelle_platform>:<UPI's proxy port>/upi-simulator/UPISedexQueryWS`

**Description**

- Pick a patient from the test data with at least one active SPID ("Persons" tab)

(i.e. Ulrich Oskar SCHRANZ)

- Send an eCH0214 request from your system to the UPI service, using the following attributes (you'll need theirs demographics) :

- <eCH-0214:searchPersonRequest>
- <eCH-0214:algorithm>default</eCH-0214:algorithm>
- <eCH-0214:searchedPerson>...

You shall receive a 200 http message with the NAVS13 and at least 1 SPID.

- You can consult the logs of your transaction in the "Messages" menu of the Proxy.

- Once the logs have been recovered, validate your request :

1. Go to the EVS Client validator : [EPR->CH:UPI->Validate](#)
2. Upload the log of your request in XML format (Soap tags have to be removed/commented)
3. Select the **eCH-0214-2** schematron validator from the drop-down list
4. Click on **Validate**
5. Copy the permanent link to your validation in the corresponding test step

**Evaluation**

The validations on EVS Client must return "**Passed**".

Show the response on your system from UPI Simulator to confirm that you received the requested attributes (it must contains **e-CH0214:positiveResponse**).

**Short Description :** UPI client receive an eCH0215 broadcast mutation and modify its patients.

## Test Description

### Special Instructions

In this test, the SUT will receive an eCH0215 Broadcast Mutation with some changes query for 4 patients.

To perform this test, you shall populate your database with the demographics below :

Test case patient number	vn	SPID1	SPID2	DateOfBirth	Firstname	Lastname	Nationality	CountryOfBirth
1	7560505286277	761337610393627121	761337610505286277	12/01/1974	KARINE FLORENCE	HERGER-BONDARENKO	8100	8100
2	7560410199921	761337610410199921		22/04/1974	Oliver Artiom	KUEHNI-TRAN	8218	8218
3	7560504876202	761337610377926585	761337610504876202	26/09/1977	MARINA DELIA	REYMOND-JACOT	8207	Unknown
4	7560410940523	761337610410940523		11/06/1982	Eric Jacques Marie	Lindner-Barth	8100	8100

### Description

- Export your 4 patients previously created in a xml or json format ; If it's not possible, make a screenshot of your GUI.
- Copy the file [eCH-0215-Broadcast-Sample.xml](#) in your Sedex system's inbox.
- Make sure your system takes in account the new message ; if it isn't done automatically by your SUT, you shall perform an action on it.
- Export the same patients as step 1 in the same format and verify that they've been modified by your SUT.
- Attach your exports (or screenshots) in your test instance.

### Evaluation

To validate the test, monitor shall check if :

- Patient1's first SPID is inactive.
- Patient2's SPID has been cancelled.
- Patient3 still have his 2 active SPID.
- Patient4's birthdate has been changed

## Test Participants

**Role in test :** UPI\_UPI\_CLIENT (SUT)
